

Reman Compactor Wheels

For 826 & 836 Landfill Compactors

Reman line of Compactor Wheels available with various tip options

When the wrapper thickness is worn too far to allow another retip, a Reman compactor wheel can provide a cost effective replacement option. The Reman wheels are 100% rewrapped providing a service option that should provide at least two lives. The wheels are available in various tip configurations to support various conditions. Caterpillar® encourages you to work with your dealer to determine which ones would work best in your particular application.

Reman Compactor Wheels

Benefits

Lower Owning and Operating Costs

- Same as new at a fraction of the price
- 100% rewrapped with hardfacing, wear bars and rim extensions as necessary, and Cat® tips to maximize service life
- Reman exchange eliminates cost of downtime associated with having wheels rebuilt

Simple to Use Core Inspection Criteria

- Simple visual inspection
- Certain competitive cores acceptable for full credit. Others allowed partial credit.

Warranty

- All Reman products carry same as new parts warranty
